

Supplier Diversity and Best Fit Practices

Client Profile

Our Client is a global leader in communication systems, applications, and services. They design, build, deploy and manage networks for enterprises. Customers range from small businesses and non-profit agencies up to more than 90% of the companies in the FORTUNE 500, and the U.S. government. All rely on our client for reliable, secure networks that facilitate customer relationships, enhance productivity and maximize profitability.

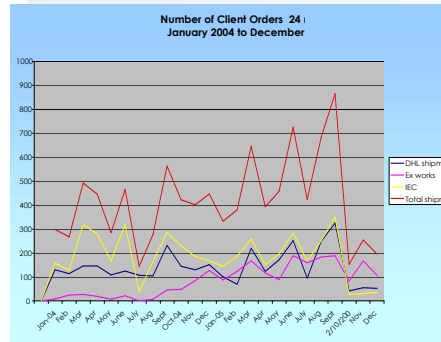

Standard pick/pack operation for our client, that also encompasses a varied portfolio of value add services.

FLEXLogistics Role

Over the last number of years, the services that FLEXLogistics have on offer to our client have evolved from the 'logistics industry standard' to a bespoke offering that moulds to fit the ever changing shape that is the clients requirement. In conjunction with almost 200 daily transactions for this client alone, we manage a running average of over 100,000 units at any one given time.

We incorporate daily, weekly and monthly metrics into our service provision. The raw data for these and many other details comes from our extremely interactive and flexible Inventory management system. The delivery of these reports is collated by our highly trained, experienced staff working with our client to get the best fit results.

- Cycle Counts
- E-mail Pre-Alerts
- Edi Stock Reports
- KPI Reports
- Order Fulfilment Reports
- Quarantine Reports
- Quality Assurance Checks
- Reconfigure customer product
- Bespoke I.T. Solutions

Supply Chain Management.

We have implemented value add services for this client that range from pre-alerting orders to procurement of material while completing 100% of orders at quarter end and maintaining 99.80% Inventory Integrity.

We recognise that the diversity that this client has to offer the market place has to be mirrored by it's service provider and together we have adopted a continual improvement ethos that works in a streamlined manner over a fiscal term that enables us to implement best practices and learn and improve on them. We believe that to look forward, you must look back. Reviewing our business is an integral part of our forward planning and allows us progress with confidence in our people, processes and systems.

Metrics packs are formatted to comply with the clients requirements in line with the services that we provide.
