

Vendor Metrics Portal

The Challenge:

The FlexLogistics hub in Limerick is the largest in Ireland, (29K pallet locations; 1,200 Kanban locations, 20,000 Part Numbers: 24 / 7 Operation, 200+ customers). All the product is vendor owned and held under VMI rules. FlexLogistics required a solution that would provide our customers with up to date information and metrics to support their business and mission critical decision making.

FLEXLogistics Warehouse

Flextronics Solution:

All product is bar code labelled at a case level and all transactions are paperless. Receipts, movements and issues are captured via radio frequency scanners. These transactions are messaged electronically back to the customers/vendors planning or ERP systems. This results in millions of transaction messages being messaged in real time or nightly. In addition to this, FlexLogistics have created a Metrics Portal for each supplier to report back Key Performance Indicators. Over 200 Customers/Vendors log in weekly to view the key performance parameters for their products in the hub :

Please select the Flextronics Logistics LIM Hub Vendor Metrics report required:

	Received/Issued Received/Issued By Stock File		Location Accuracy Location Accuracy Percentages
	Aged Inventory Aged Inventory By Stock File		Aged Quarantine Aged Quarantine By Stock File
	Inventory & Damage Performance		AR Details
	Customer Satisfaction Survey		Access Log Report Configured Vendors Report

The Results:

- Web based, metrics pack accessible 24/7.
